

```
1 class Test Implement Runnable
2 {
3     public void run ()
4     {
5         System.out.println("Thread task");
6     }
7     public static void main(String[]args)
8     {
9         Test t=new t Test();
10        Thread th=new Thread(t);
11        th.start();
12    }
13 }
14
```
